Fertigation Control System

Easy and Accurate Control of Fertigation

Pumps from our RIOT App

FASTEST ROI

Nimbus is an affordable fertigation control system that delivers one of the fastest Returns on Investment (ROI) on the market today.

ACCURACY

Nimbus is field tested and proven to be within +/- 2% when operated within 90% of the pump's Gallons Per Hour (GPH) rating.

OVERSIGHT

Nimbus field panels provide growers with peace of mind by delivering real time data through EverSolve's easy to use RIOT app.

LOSS PREVENTION

Nimbus' user friendly controls, stop points, and batch jobs allow growers to control injection pump run times and conditions.

DATA ANALYTICS

The RIOT app displays real time data on each circle. Growers can view the Global Dashboard for a bird's eye view of production operations and alarms.

ANY PUMP

Nimbus is designed with two quick-connect plugs that work on any 3-phase fertigation or chemigation pump. No need for math—just set your GPH and get started!

TECL #36062

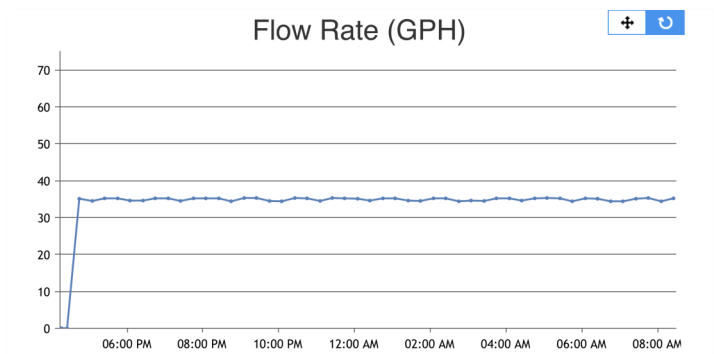

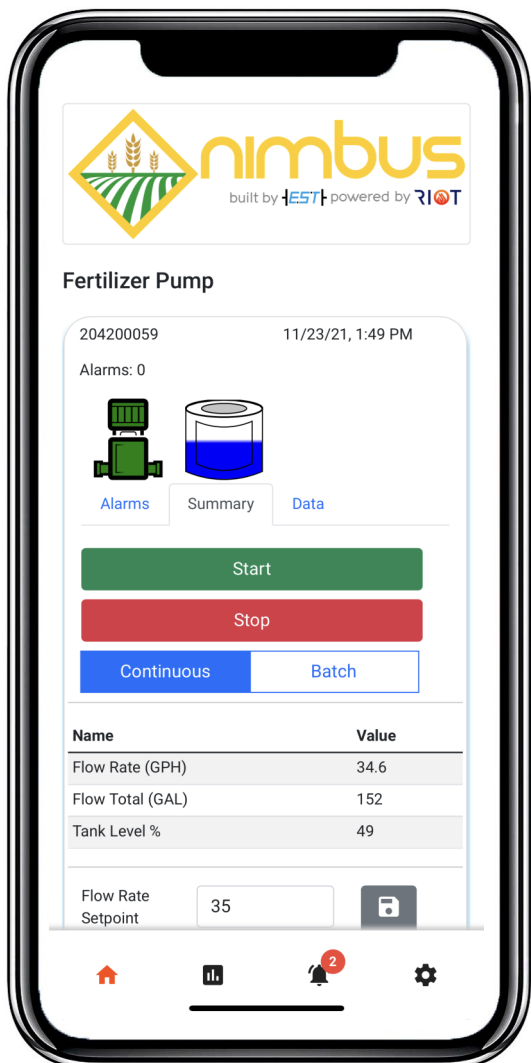

Remote Integrated Operational Technology

RIOT is the latest in field SCADA technology giving growers the fastest and most economical way to remotely control fertigation and chemigation pumps from the RIOT app or any web browser.

What Makes RIOT Better?

- Easy App or Desktop Access
- Alarms via Push Notification
- Reporting and Data Exports
- Talks Directly to the Cloud
- Cyber-Security with MQTT
- Built-in Backups for Data Protection
- No Servers to Install or Maintain
